

Dr. Tamma, Krishnapriya

PhD Institution and Year : National Centre for Biological Sciences, TIFR, 2016

Date of Joining IISc : 2 May 2016

Area(s) of Research : Ecology

Name of the Post-doctoral Fellowship : NA

Laboratory where currently working : Dr. Vishwesh Guttal lab

Department : Centre for Ecological Sciences

Email address and Telephone number :

Topic(s) of Research : Spatial vegetation patterns

Research Publications in IISc : NA

Other accomplishments and recognition while in IISc : NA

What information will be useful to post-docs if it is available on the post-doc page on the IISc Website ? List the items.

- a) List of facilities that post docs can access (apparently different from those of PhD students). Making sure that these are highlighted will be useful. If this is not true, then clarifying this will be even more useful! For example - are rules of travel different?
- b) Maybe a short document that lists all the fellowships that post docs can apply to?
- c) Maybe a mailing list for post docs that they can use to organize events or plan meetings? This will be useful also if post docs want to ask others specific questions regarding fellowships etc.

Comment: I would appreciate if IISc has a platform for post docs to interact professionally. Often, we don't know any other post docs in related departments too! Maybe organizing symposia once in a year or so may also be helpful to aid cross talk and collaboration!

A tweet about your post-doctoral experience in IISc :-
