

IISc MEDICAL IMAGE COMPUTING WORKSHOP 2023

(AXIS BANK CENTRE FOR MATHEMATICS AND COMPUTING)

Open to all researchers and students interested in the area of medical imaging

The workshop aims to bring together researchers working in medical imaging to focus on computational algorithms for quantitative medical image analysis. The workshop will provide wonderful opportunity to interact and network with academics, clinicians and experts from industry.

SCOPE

Topics of discussion may include, but not limited to, recent novel techniques for:

- medical image reconstruction, registration, segmentation on various imaging modalities
- improving deep learning model generalizability
- applications including computer-aided diagnosis, therapeutic planning and follow-up.

CALL FOR POSTERS

Interested students are encouraged to present a poster on the above topics.

Three Best Poster Prizes

Accommodation and Registration Fees are Waived for full-time Research Students

IMPORTANT DATES

05 th Feb 2023	Workshop registration
18 th Feb 2023	Poster soft copy submission
24 th Feb 2023	Poster session

February 24 – 25, 2023

**S.V. Narasiah Auditorium,
Dept of Instrumentation and
Applied Physics, IISc**
